Personal Trainers want to help others. But often even our best efforts fall short. You can lead a horse to water...

In this course you will learn how to:

- Keep more clients and earn a more consistent income
- Get fewer of the clients who quit soon after you start
- Create a bullet-proof agreement with clients that sets both of you up for success and holds you both accountable (not your typical contract)
- Continuously escalate your clients motivation levels
- How to help them use their mind correctly to get what they REALLY want.
- Increase referrals

You will leave this course with improved sales skills, a template for contracts that keep them accountable, and an increased ability to help your clients thrive!
